INTRODUCING THE . . .

FLEETRITE®

A solid state ignition system that fits inside the distributor.

ANNOUNCING . . .

A completely self-contained ignitor, no "Black Boxes" to clutter the engine compartment, no complicated wiring, no extras to buy, and no more changing points! Magnetically triggered timing remains constant within 1/4 degrees accuracy. The ignitor can stretch spark plug life and fuel economy, too. An average mechanic can install the ignitor in 4, 6, or 8 cylinder engines in less time than it takes to change a set of points.

The Fleetrite Ignitor . . .

Breakerless Ignition System

Economy - Improves fuel mileage, extends spark plug life, eliminates minor tune-ups. The ignitor quickly pays for itself.

Easy to Install - One piece installation, two wires to connect. As easy as changing points. Complete ignitor fits inside distributor.

Engineering - Precision engineered. Switches twice the energy of any other system. Immune to dust, oil, dirt, heat and moisture.

Guarantee - Sure starts every time!
